

CAD

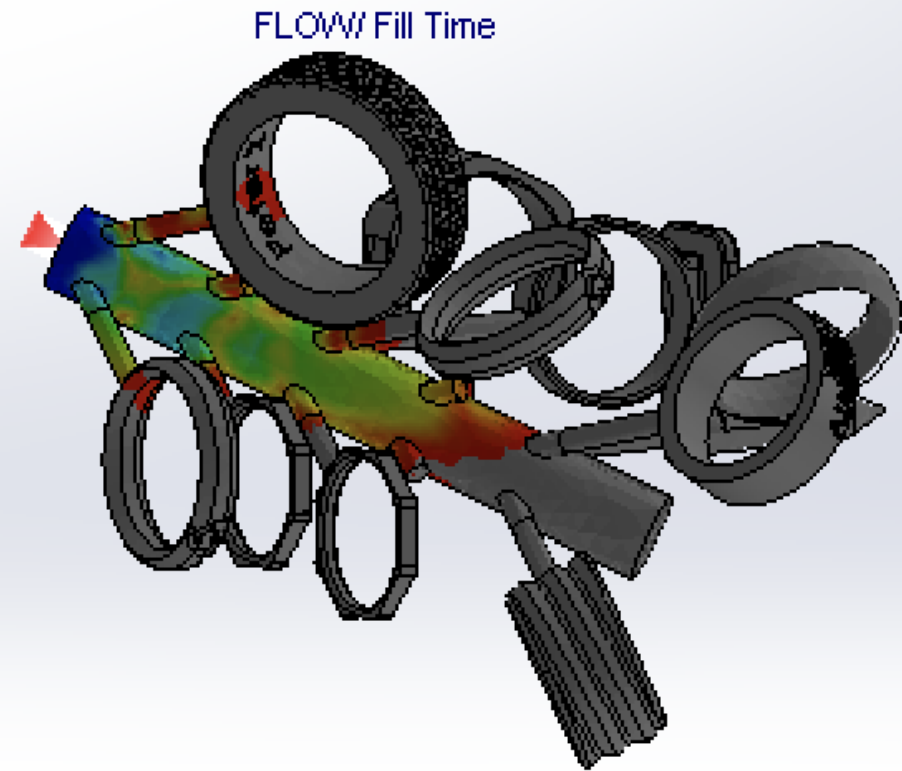

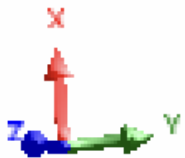

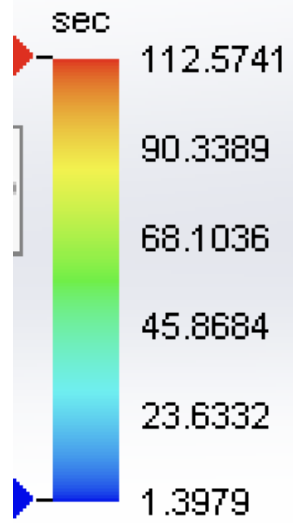

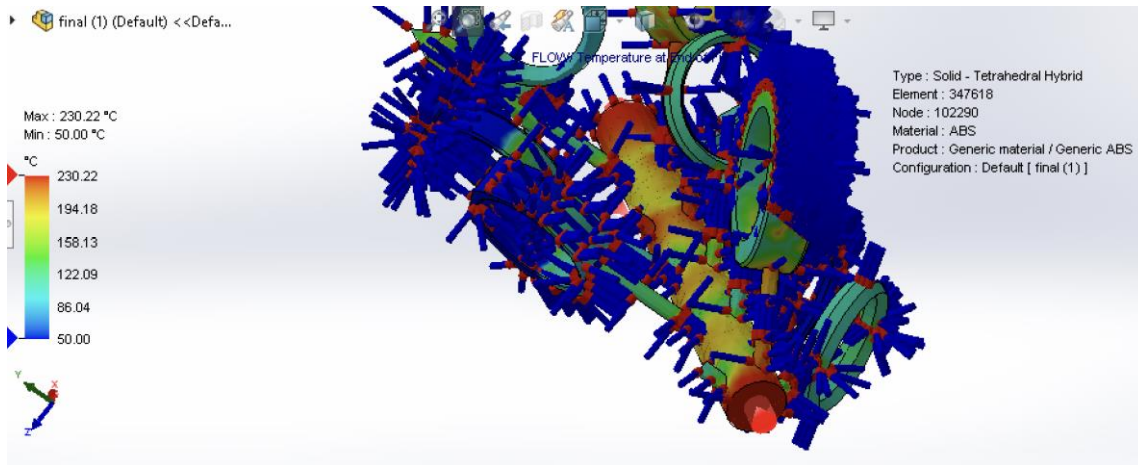

Petros Sklavounos

1st Try: Incomplete , flow didn't reach rings

Max : 112.5741 sec

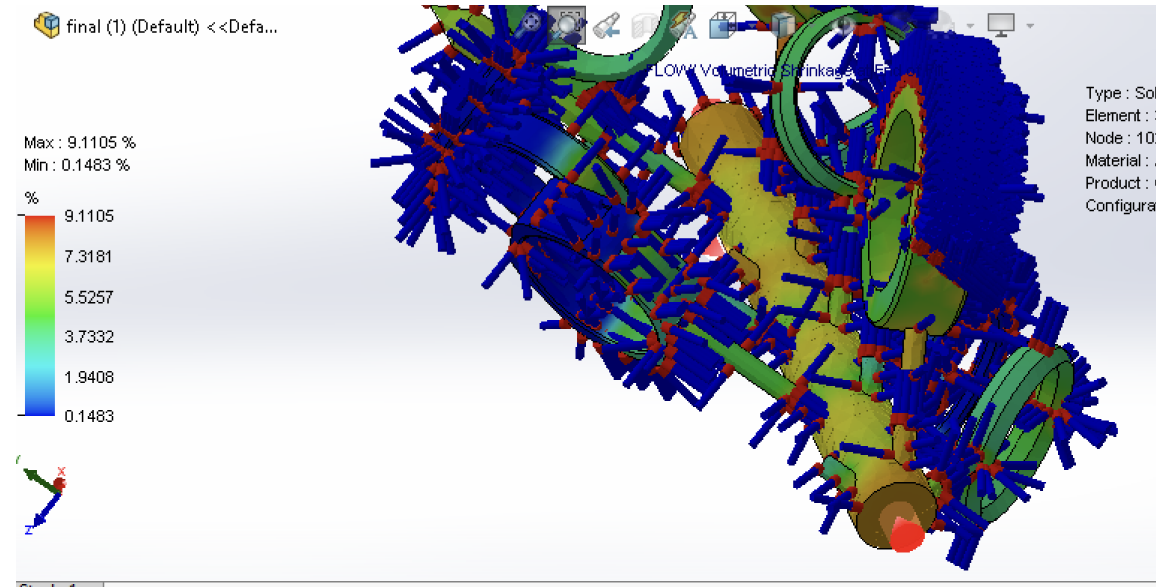

Min : 1.3979 sec

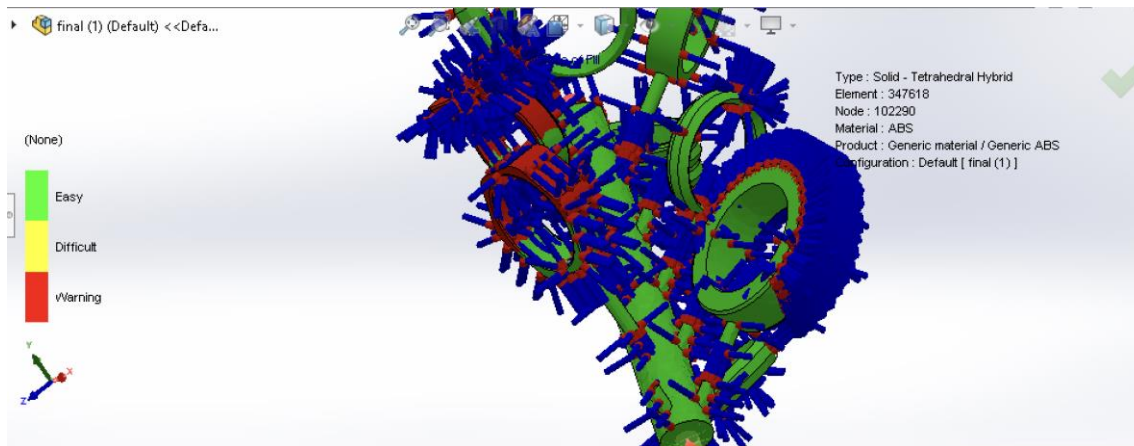

Flow Temperature

The weird blue nerf bullets are the boundary conditions of the walls which I could not suppress when viewing results.

Flow Volumetric Shrinkage

Ease of injection Second Attemptmp:901 seconds, heated walls and multiple inlets to prevent premature cooling, reached entirety
